2. App Control

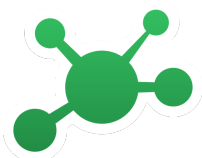

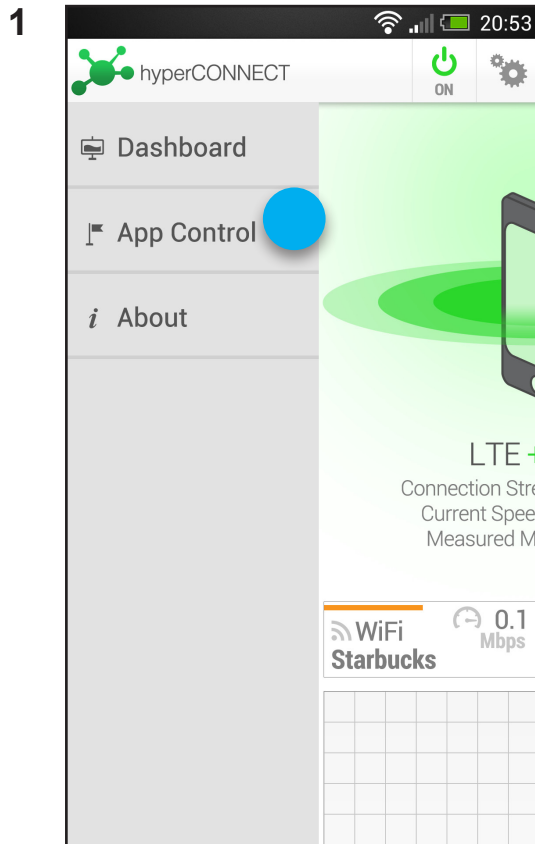

I want to save money by customizing which app uses WiFi only or WiFi + LTE for speed

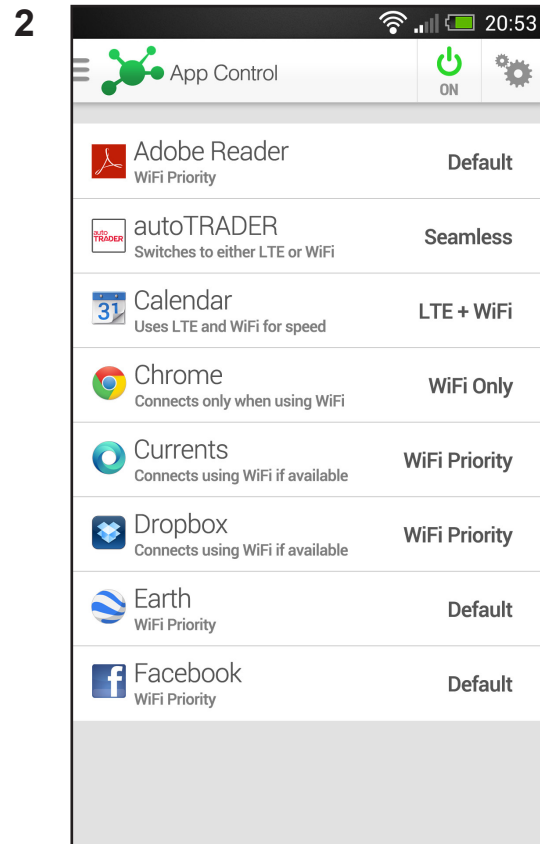

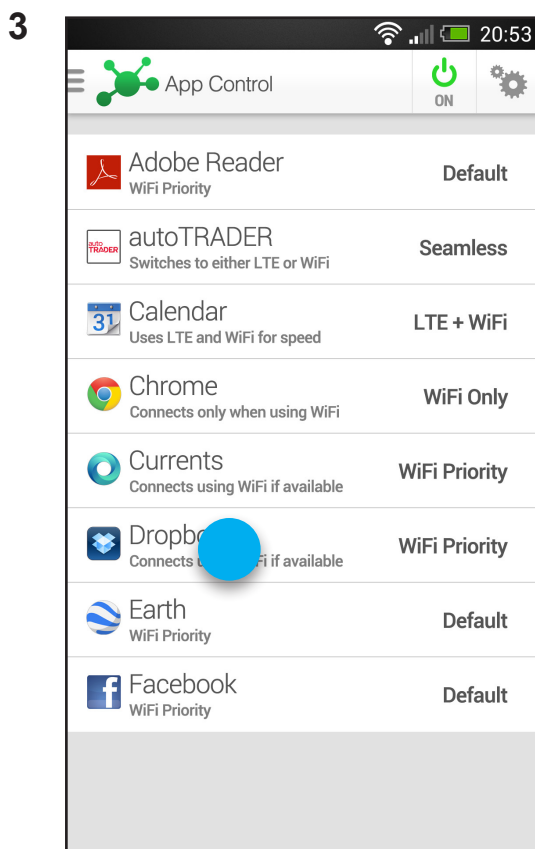

hyperCONNECT Android App
by Pravala

1

Tap on "App Control" link in the
Navigation Drawer

2

The user can view settings for each individual
apps, all in one screen. Swipe up to scroll
down through the list.

3

Tap on an app in the list to change
the settings for that app

4

Choose one of the connections and
press Cancel or OK button to cancel or
confirm the change

5

To change the Default connection,
tap on Settings

6

Which takes the user to the Settings menu

7

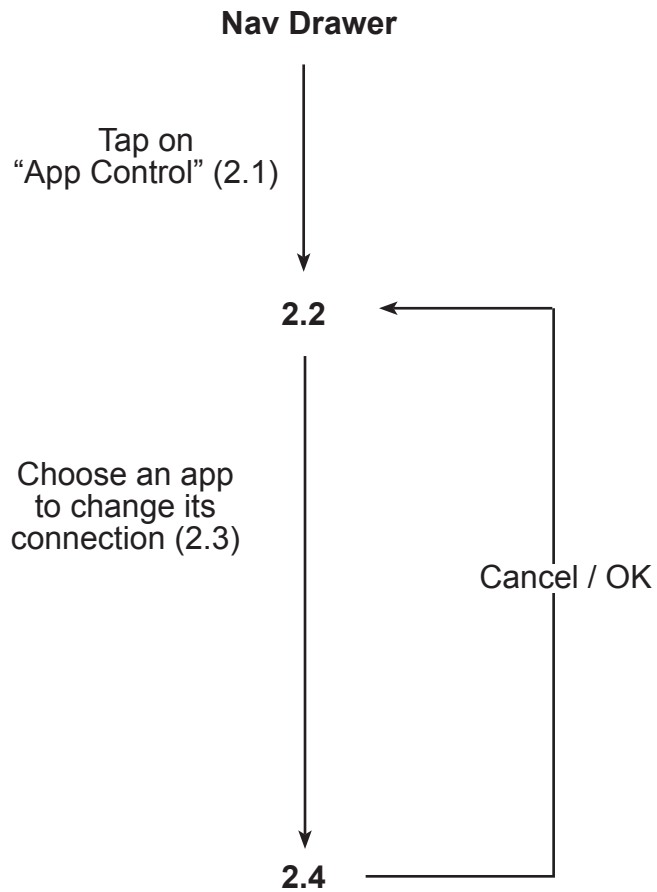

Tap on "Default Connection"

8

Select the connection for the "Default" option
of App Control and tap Cancel or OK to cancel
or confirm the changes

Workflow

Customize connection for individual apps: *Change the "Default" connection:*

Nav Drawer

Tap on
"App Control" (2.1)

2.2

Choose an app
to change its
connection (2.3)

Cancel / OK

2.4

2.2

Local "Back"
button

Tap on
"Settings"

Settings (2.6)

Tap "Default
Connection" (2.7)

Cancel / OK
